
Boot Loader

v000.1

Boot loader porting/updating is necessary when you implement embedded system with some unique hardware. Sometimes boot loader is provided by BSP supplier. However if you create BSP by yourself you need to port some boot loader as well.

OKTET Labs engineers have experience with boot loaders like uboot, etherboot, RedBoot, PMON, PPCBboot and in-house boot loaders.

OKTET Labs engineers will help you to choose the boot loader which is most suitable for you hardware and perform the porting/adaptation.
