# Performance Analysis

v000.1

Performance analysis is intended to find out all bottlenecks and provide a recommendations for their fixing with minimal cost and human efforts.

This service includes review of your code, but additionally the performance measurements and profiling are performed.

OKTET Labs has a tool [[/test\\_env.rhtml](#)] for network protocols testing which includes stress testing and performance measurements functionality. OKTET Labs provides this tool for its customers under terms of GNU Public License v2 [<http://www.gnu.org/licenses/old-licenses/gpl-2.0.html>]. Moreover, OKTET Labs engineers can create a test suite according to customer requirements.
